EARLY HYBRID LILACS

This class blooms a few days or a week or more earlier than the Vulgaris or French Hybrids. Clusters are usually very large and graceful. The Canadian varieties are of very recent introduction and we expect they will become popular as stocks become available. Remember that these lilacs, as well as all others that we sell, are strictly OWN-ROOT.

		18-24"	2-2½ ft.	2½-3 ft.	3-4 ft.

LATE LILACS

Under this heading we are grouping all the different lilac species, varieties and hybrids that bloom after the common or French lilacs have bloomed. Our stocks of these lilacs are too low to give any of them detailed description. Lilac enthusiasts and those who have seen them in our fields will recognize the sorts they desire from the short descriptions given. Of course the plants are OWN-ROOT.

Price List for Fall 1949

OWN-ROOT LILACS, MOCK ORANGE, FLOWERING ALMONDS, PLUMS, ETC.

The GARDNER NURSERY LILAC COLLECTION contains most of the finest varieties of FRENCH LILACS in existence. We say the finest because our varieties are so listed by "Lilacs for America". We have 99 of the 100 listed as the very best, and all but three or four of our varieties are in the recommended list of that publication.

We also have most of the Lilac species and many of the Hybrids between species, including practically all of the fine new Canadian Early Lilacs and many of the late Canadians. In all, we have more than 250 varieties of Lilacs, many so new and rare that they are offered by few nurseries.

OWN-ROOT LILACS

Over 90 varieties are offered in this list, many of the varieties being in the new and scarce class.

People familiar with Lilacs know the importance of having lilacs grown on their own-roots. Such plants are easier to start and are as hardy and as long living as a common lilac. Grafted lilacs seldom do well until they produce their own-roots. Some take years to do that, many never do and remain stunted and eventually die.

Producing OWN-ROOT Lilacs is slower and more costly than propagation by grafting; therefore true OWN-ROOT lilacs are offered by only a few specialists.

Every GARDNER Lilac offered is a genuine OWN-ROOT plant, never a privet graft that may some day have its own roots if planted deep. Every plant is grown right here in our nursery.

TERMS: Cash with order or 25 per cent payment with order, balance C. O. D. All Lilacs and other Shrubs shipped by express, customer to pay all transportation cost. No charge is made for packing.

DISCOUNT: As large orders cost little more to fill and pack than small ones, the saving is passed on to our customers by the following discounts:

- 10% discount on orders amounting to \$10 or more
- 15% discount on orders amounting to \$25 or more
- 20% discount on orders amounting to \$50 or more

NOTE: The following is a list of varieties and sizes that should be ready for fall sale provided the sizes are not changed somewhat during the summer. Stocks of many varieties in this list are extremely limited. They are indicated by an 'X' before the name. When ordering these scarce items, indicate second choice if you desire us to substitute. We never substitute unless the customer advises us to do so. We do not buy in stock to fill orders where short.

DOUBLE, SINGLE, AND JAPANESE PEONIES

Peonies are the most easily grown of all the hardy flowering plants. Each year they produce a weath of gorgeous blooms over a period of several weeks. With a little care the plants live and produce for many years, therefore, it pays to plant only the finest varieties. Our list contains many of the highest rated varieties.

SIZE OF PLANTS--All plants sold are strong divisions, 3 to 5 eyes or more, with a good root system. Strong plants that usually bloom the first year and with proper care quickly develop into large clumps.

PLANTING AND CARE--Fall planting is best for Peonies. Set them anytime before the ground freezes.

Set the roots so the buds or eyes are upright. Plant the roots so the buds are just about 2 inches below the surface. Do not plant too deep or the plants may fail to bloom.

The first winter, hill the ground slightly over the plants and cover with a little straw or coarse mulch but avoid leaves or anything that may become too wet. Remove mulch and level ground after ground thaws in Spring.

Feed peonies with a little commercial fertilizer several times each summer. Spread it around the plants, not on them and hoe it into the ground.

NOTE: WE FILL AND SHIP PEONY ORDERS IN FALL ONLY.

TERMS: Cash with order or 25% payment with order, balance C.O.D. We pay postage on all peony orders amounting to \$5.00 or more. Add 25¢ to cover postage and packing on orders under this amount. If plants are sent C.O.D. the collection charges are charged to the customer.

If orders include both peonies and lilacs or other shrubs, the peonies are sent by mail post paid, but the shrubs are shipped by Express, customer to pay all transportation charges.

We start filling peony orders early in September and the bulk of the shipping is done just after the middle of the month. We can ship at any time from Sept. 1st to Oct. 31st, if customer indicates desired date.

DISCOUNT: As large orders cost little more to fill and pack than small ones, the saving is passed on to our customers by the following discounts:

10% Discount on orders amounting to \$10.00 or more
15% Discount on orders amounting to \$25.00 or more
20% Discount on orders amounting to \$50.00 or more
Lilacs and other stock may be included to make up the amounts.

MOSS LEAF PEONY OR FERN LEAF PEONY

Tenuifolia Flore Plena: This is the double early peony so much sought after, and so difficult to find. Very ornamental fern-like or moss-like foliage and large, brilliant double red flowers early in May. We have a few strong, vigorous roots of this desirable peony to offer for Fall delivery at only \$2.50 each.
